Product discontinuation Fronius Symo 10.0-20.0

Dear business partner,

We are writing to inform you in advance that **Fronius Symo 10-20 kW** inverters will be discontinued as of May 31, 2023. The primary reason for the discontinuation is the launch of a new product called Fronius Symo Advanced, which includes Fronius Arc Guard Technology and will succeed the Symo series.

The main motivation for the transition to Fronius Symo Advanced is the compatibility of this product with Arc Fault Circuit Interruption (AFCI). AFCI is already important in many of our markets due to the upcoming IEC standard (IEC 63027) for AFCI. It is expected that many other markets will follow this standard. We have also increased the array short circuit current due to new installation standards. Parameters such as other technical data or packaging size will remain identical to the predecessor.

Important dates to remember

- Symo Advanced First order - November 2022
- Symo Advanced Start of sales - May 2023

Further details are stated as below:

Products to be discontinued as of May 31, 2023 Symo (Standard)		Products to be launched starting June 1, 2023 Symo Advanced

Further details

- **Business as usual for partners and customers** – We will ensure a fast transition to successor products to avoid possible bottlenecks in the supply chain from our side.
- **Services after product discontinuation** – Services for the discontinued products are guaranteed in line with the Fronius service strategy, regardless of the product discontinuation.
- **Options and accessories** – All options and accessories available for Fronius Symo (Standard) will also be available for Fronius Symo Advanced.

If you have any further questions, please get in touch with your Fronius representative.

Best regards,

Your Fronius Team
